TECHNICAL SPECIFICATION

1000 and 2000 litre Highway Model Bunded Diesel Bowsers

Manufactured from 3mm thick mild steel plate with flat ends and internal anti-surge baffles, the bowser tanks are fitted with a high flow piston hand pump. Generating a flow rate of 90 litres per minute, the unit comes complete with 6M of 25mm bore fuel hose and aluminium trigger nozzle. The pumping equipment is fully enclosed within a lockable pumping chamber.

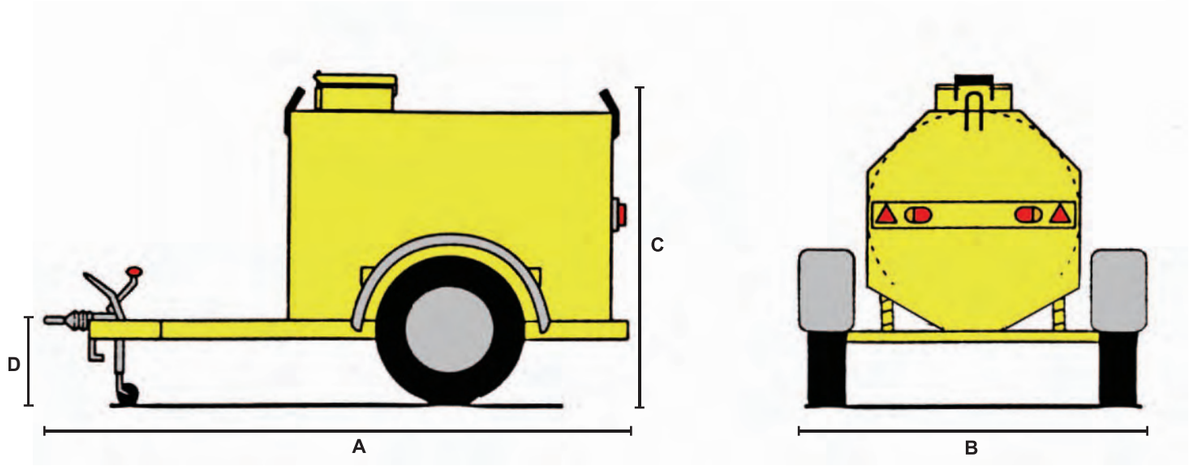
The tank is mounted on a galvanised chassis unit, manufactured from 100mm x 50mm Rolled Hollow Section with a stand-on footplate on the drawbar, and fitted with a single leaf-spring suspension axle. All units are equipped with a hydraulically damped towing hitch with an eye or ball coupling, heavy duty jockey wheel, overrun and lockable parking brake.

Our standard lighting board will be fitted, wired through the chassis and supplied with an international 7 pin plug.

The 1000 litre models will be supplied with 2 x 185 x 14" wheels and tyres, and the 2000 litre models will be supplied with 2 x 750 x 16" wheels and tyres, all fitted under galvanised steel mudguards. These products are fully road legal and certified for The Carriage of Dangerous Goods.

The 1000 and 2000 litre site models are identical to the highway units, but as these were designed primarily for off-road use, suspension, mudguards, brakes and lights will not be supplied.

After manufacture, the tank is finished gloss painted in a colour of your choice.



Model	Approximate Unladen Weight	Approximate Laden Weight	A	B	C	D
1000 Litre Highway Model (MH1000B)	585KG	1486KG	3350mm	1500mm	1650mm	530mm

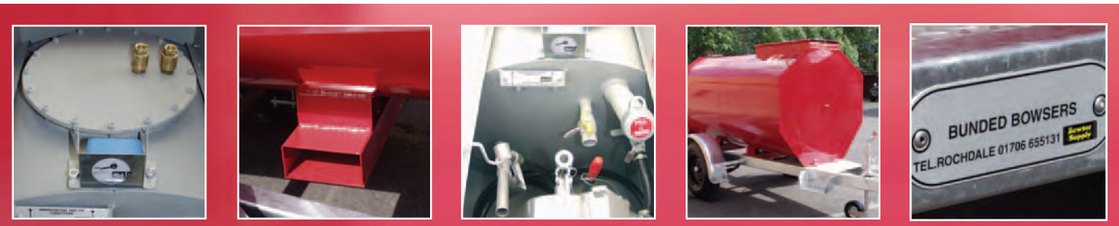
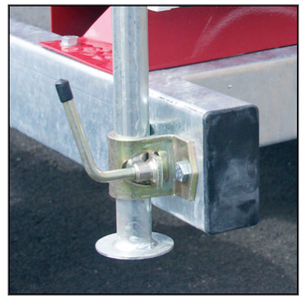
Bowser Supply

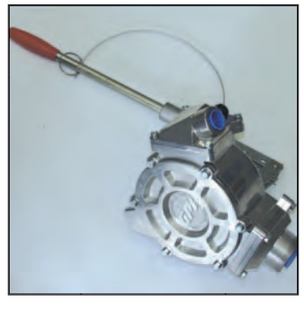
Bunded Bowser



Bowser Supply **fully bunded Diesel Bowsers meet all current regulations, legislation and are UN approved for the Carriage of Dangerous Goods.**

Bowser Supply: The No.1 choice for Bunded Bowsers





Bowser Supply have been designing, manufacturing and supplying their top quality, high performance diesel fuel carrying bowsers to British industry in excess of twenty years.

Over this period the company has earned an enviable reputation with it's customers for complete reliability. Because both the inner and outer shell are manufactured from 3mm mild steel, the standard working life expectancy of a Bowser Supply bowser is very likely to exceed 20 years. The bowsers, therefore, represent a long term investment to buyers and are outstanding value. This coupled with our excellent after sales service and support make Bowser Supply the preferred supplier to some of the top names in a variety of industrial sectors.

Bowser Supply Bunded Diesel Bowsers are available from stock in 1000 or 2000 litre models, choose from :

- Site or highway specifications
- Static tank version which is mounted on a robust skid frame or
- Supplied with stacker truck access points for ease of movement

All of our units are UN Approved for the Carriage of Dangerous Goods and are supplied with a unique fully traceable UN Certificate and serial number.

The finishing touch

Bowser Supply bowsers can be finished in a choice of gloss painted colours to compliment your individual corporate identity.
